ALTABA INC. FORM 8937

PART II, LINES 15, 16, AND 18

In general, the liquidating distribution will be treated for U.S. federal income tax purposes as part of a series of distributions in complete liquidation of Altaba Inc. ("Altaba") in which amounts received by stockholders are treated as full payment in exchange for their shares of Altaba common stock. The liquidating distribution will first be applied against and reduce a stockholder's adjusted tax basis in its Altaba common stock. A stockholder will recognize gain as a result of the liquidating distribution to the extent that the value of the liquidating distribution (\$0.96 per share) received by the stockholder with respect to a share exceeds the stockholder's adjusted basis in the share. A stockholder generally cannot recognize a loss on a liquidating distribution until the final liquidating distribution is made. If a stockholder holds different blocks of Altaba common stock (generally as a result of having acquired shares at different times or at different prices), gain or loss is calculated separately with respect to each such block.
